

# 1 Description

blindex — Index-making of Biblical literature citations in Typst.

## 2 Quick Intro

### 2.1 Inline citations with #iq

Inline biblical literature citations are made by calling the

```
#iq(body, abrv, lang, pssg[, options])
```

function, which, without passing any option, results in: “For God so loved the world, that He gave His only begotten Son, that whoever believes in Him shall not perish, but have eternal life.” — John 3:16.

#iq() options include:

- version — specifies the biblical translation/version;
- cite — specifies the chapter and verse;
- qlang and clang — specify the quote and citation languages;
- quo — specifies the quote text formatting; and
- cit — specifies the citation text formatting.

#### 2.1.1 Colors

Controls for text and background colors are available:

```
#iq([...], "Jhn", "en-3", [3:18], quo: (fmt: (fill: red), bkg: none))
```

which renders as: “He who believes in Him is not judged; he who does not believe has been judged already, because he has not believed in the name of the only begotten Son of God.” — John 3:18.

#### 2.1.2 Versioning and Bibliographycal Citations

Controls for version rendering and citation are available through the version and cite options:

```
#iq([...], "Jhn", "en-3", [3:19], version: "NASB95", cite: [@NASB95])
```

which renders as: “This is the judgment, that the Light has come into the world, and men loved the darkness rather than the Light, for their deeds were evil.” — John 3:19 (NASB95<sup>1</sup>).

#### 2.1.3 Multilingual Examples

Take, for instance the following all-English citation with default options: “Seek the LORD while He may be found; Call upon Him while He is near.” — Isaiah 55:6. Multilingual support is flexibly achieved with the qlang and/or clang options — for quote and citation languages, respectively — as

```
#iq([...], "Isa", "en-3", [55:6], version: "LSG", cite: [@LSG1910], qlang: "fr")
```

produces: « Cherchez l’Éternel pendant qu’il se trouve; Invoquez-le, tandis qu’il est près. » — Isaiah 55:6 (LSG<sup>2</sup>) — note the proper French-style quotation marks and the English-formatted citation. On the other hand, for an all-French citation, the following

```
#iq([...], "Es", "fr-T0B", [55:6], qlang: "fr", clang: "fr")
```

renders as « Cherchez l’Éternel pendant qu’il se trouve; Invoquez-le, tandis qu’il est près. » — Esaïe 55:6.

---

<sup>1</sup>New American Standard Bible (The Lockman Foundation, 1995).

<sup>2</sup>Louis Segond (1910).

### 2.1.4 Fine-Tuning Quotes

Manual specification of opening and closing quotes can be tweaked as:

```
#iq([...], "Jhn", "en-3", [3:20], quo: (opq: [], clq: []))
```

which renders as: For everyone who does evil hates the Light, and does not come to the Light for fear that his deeds will be exposed. — John 3:20 — note the absence of opening and closing quotes due to the `quo.opq` and `quo.clq` parameters specified as empty `typst` contents.

## 2.2 Block Quotations

Block quotations, for “displayed” blocks of biblical citations are available through the

```
#bq(body, abrv, lang, pssg[, options])
```

function, which has a similar syntax as it’s inline counterpart, and some block-related additional option arguments. A plain example is:

For there is one God, and one mediator between God and men, the man Christ Jesus; Who gave himself a ransom for all, to be testified in due time.

1 Timothy 2:5,6 (KJV<sup>3</sup>)

As blocks of text are usually meant for larger portions, such as paragraphs or passages, a convenience function `#ver()` is also provided for convenient verse-number formatting:

**18** For the wrath of God is revealed from heaven against all ungodliness and unrighteousness of men, who hold the truth in unrighteousness; **20** For the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made, even his eternal power and Godhead; so that they are without excuse: **21** Because that, when they knew God, they glorified him not as God, neither were thankful; but became vain in their imaginations, and their foolish heart was darkened. **22** Professing themselves to be wise, they became fools,

Romans 1:18,20–22 (KJV)

## 3 Usage Example

In the context of telling God’s prophecies apart from those of false prophets, the Septuagint uses the phrase *ὁμοίως λαλήσαντι* — Deuteronomy 18:22 (LXX<sup>4</sup>) (*homoios lalesanti*), which can be translated as “speaking in the same manner” or “speaking thus.” This phrase emphasizes that legitimate prophecies from God should be understood and interpreted based on the exact way it was spoken.

Here’s the text with the relevant phrase highlighted (formatted without verse numbers and with default options):

ἐὰν δὲ μὴ γένηται, ἐν τῷ λαλῆσαι αὐτὸν ἐν τῷ ὀνόματι κυρίου, οὐκ ἐκείνου λαλήσαντος, ἐν τῷ ὁμοίως λαλήσαντι, ἀπαρχὴ ἐν τῷ λαλεῖν αὐτὸν, ἀπαρχὴ ἐν τῷ μὴ ἀληθεῦσαι τὸν λόγον αὐτοῦ, ἐν τῷ λαλῆσαι αὐτὸν ἐν τῷ ὀνόματι κυρίου.

Deuteronomy 18:22 (LXX)

<sup>3</sup>King James Version (Brown Books Publishing, 2004).

<sup>4</sup>Alfred Rahlfs, *Septuaginta*, 1st ed. (Sociedade Bíblica do Brasil, SBB, 2012).

This further supports the logical conclusion that God’s prophecies should be interpreted “as stated,” without introducing arbitrary flexibility or vagueness.

## 4 Biblical Citations

The main point of the package is to enable the *automatic generation of a biblical literature citation index*, once all the citations have been made with the `#iq` and `#bq` functions, irrespective of whether or not `#ver()` has been used. This is simply accomplished by calling the following function:

```
#mk-index()
```

which renders as

### Deuteronomy

18:22 ..... 2

### Isaiah

55:6 ..... 1

### John

3:16 ..... 1

3:18 ..... 1

3:19 ..... 1

3:20 ..... 2

### Romans

1:18,20–22 ..... 2

### 1 Timothy

2:5,6 ..... 2

Language and book sorting traditions selections are possible through the `lang` and `sorting-tradition` options. Therefore, the following function call

```
#mk-index(lang: "fr-TOB", sorting-tradition: "Oecumenic-Bible")
```

automatically generates a citation index with book names in French — the `lang: "fr-TOB"` option, and with books sorted according to the "Oecumenic-Bible" tradition, which renders as

### Deutéronome

18:22 ..... 2

### Esaïe

55:6 ..... 1

### Jean

3:16 ..... 1

3:18 ..... 1

3:19 ..... 1

|                   |   |
|-------------------|---|
| 3:20 .....        | 2 |
| <b>Romains</b>    |   |
| 1:18,20–22 .....  | 2 |
| <b>1 Timothée</b> |   |
| 2:5,6 .....       | 2 |

The default one-column mode is controlled by the `cols` option, therefore, the following function call

```
#mk-index(lang: "br-pro", cols: 2, sorting-tradition: "Protestant-Bible")
```

generates a two-column citation index (recalling that `typst` doesn't yet offer an out-of-the-box way of balancing columns) with book names in Portuguese (according to the protestant tradition), due to the `lang: "br-pro"` option, and with books sorted according to the "Protestant-Bible" tradition, which, for instance, exclude any cited passage of the apocripha books. This renders as

|                     |   |
|---------------------|---|
| <b>Deuteronômio</b> |   |
| 18:22 .....         | 2 |
| <b>Isaías</b>       |   |
| 55:6 .....          | 1 |
| <b>João</b>         |   |
| 3:16 .....          | 1 |
| 3:18 .....          | 1 |
| 3:19 .....          | 1 |
| 3:20 .....          | 2 |
| <b>Romanos</b>      |   |
| 1:18,20–22 .....    | 2 |
| <b>1 Timóteo</b>    |   |
| 2:5,6 .....         | 2 |
